**Attendees:** This course is designed for Officers/Detectives/Agents/Supervisors assigned to Narcotics, Gangs, Intelligence, Internal Affairs, Vice, Human Trafficking, Task Forces or Specialized Units.

**Course Description:** A four-day (36 hours) training program designed for law enforcement officers who routinely use surveillance as one of their investigative techniques. The course is designed to provide the students with the knowledge and skills to successfully conduct and properly document their surveillance activities.

### The training covers:

History has shown that one of the major investigative tools used to combat crime and organized criminal organizations is "Surveillance". The old age technique of surveillance coupled with today's technology gives law enforcement officers the potential of locating criminals, and dismantling criminal organizations. Surveillance is an "Art" that can only be perfected through proper training and a tremendous amount of practice. The old saying "practice makes perfect" does not necessarily apply. The correct saying should be "perfect practice makes perfect performance". The students will experience four-days of practical hands on surveillance in realistic scenarios that mimic some of the complex criminal organizations and other crimes in which surveillance is needed. The practical scenarios challenge the student to maintain their covert role while attempting to follow the suspects. All of the instructors for this course have extensive on-the-job experience in all phases of surveillance. They have also conducted numerous surveillance-training courses.

- Students will fully document all surveillance via notes, photographs, video, etc.
- Students will brief, debrief and flow chart all six of the practical scenarios
